## DETAILED ACTION

---

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-29 and 44-48, drawn to a system and method for delivering media content, classified in class 725, subclass 32.
  - II. Claims 30-43, drawn to a method of advertising and providing media content, classified in class 725, subclass 1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility because it can be used to deliver media content. However, Invention II is drawn to a method of advertising and can be used as such. See MPEP § 806.05(d). Therefore, the asserted inventions are separately usable.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Scott P. Zimmerman, Reg. Number 41,390 on May 20, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
